

HONGGANG CUTTING MACHINE CO.,LTD

specialize in cutting press for 20 years

Foshan City , Guangdong Province, China

www.hgcuttingsystems.com

- Honggang cutting machine Co., Ltd., established in 2003 in Guangdong, China, is a leading enterprise specializing in manufacturing hydraulic cutting machine, leather embossing machine, belt embossing machine and flash cut, and integrating scientific research, design, manufacture, trade and service. Until today, we have had business relationships all countries, and agents in Australia, Germany, Thailand.
- Honggang is the first enterprise applying German balance connecting rod structure to cutting machine. Furthermore, in terms of automatic machines, we adopted parts of Japanese Mitsubishi and Omron and Taiwan's JeouGang. So, with 25-year experience, Honggang always produces world-class machines.
- Even so, Honggang steps forward ceaselessly for superior products and services.
- In 2005, we developed belt embossing machine, filling the blank in the field of domestic belt equipment. It offsets the deficiency of old roller embossing machine, and enhances its safety and embossing effect.
- In 2008, a new factory covering 20000 square meters was rebuilt in Nanhai, from which it only needs 40-minute drive to Baiyun Airport in Guangzhou. Therefore, Honggang can provide perfect products as well as services.
- Moreover, in 2013, we developed another advanced machine, oscillating knife cutting table, following flash cut. Compare with other cutting machines, it has higher speed and is more precise for its full automatic system. In addition, it is widely suitable for leather goods, gaskets, garment etc.

Industries Application

- [Leather goods](#)
- [Bags](#)
- [Footwear](#)
- [Plastic Blister](#)
- [Foam](#)
- [Facial mask](#)
- [Fabric](#)
- [Paper](#)
- [Plywood](#)
- [Rubber](#)
- [Gaskets](#)
- [Abrasive tools](#)
- [Insulation products](#)
- [Automotive Interior](#)

Cutting Plastic Blisters Solutions

- **Introduction**

- Honggang owns irreplaceable experiences and capacity in plastic thermoforming products cutting. We design, develop and manufacture :
 - [Manual Sliding Table Cutting machine](#)
 - [Automatic Cutting Machine for blister packaging](#)
 - [Cutting + Stacking tools Machine](#)
 - [Clear Box Cutting Creasing Making Machine](#)
 - [Thermorforming+Cutting+ Stacking machine.](#)
- As well, we can offer other solutions for plastic filter die cutting, plastic film creasing cutting...

Cutting Plastic Blisters Solutions

- Manual Sliding Table Cutting machine

- Stroke: 50-240mm(190mm, daylight 240mm)
- Cutting force 30 tons to 60 tons.
- Cutting area 610/710/810x1220/1400/1600mm...

- **Optional:**

- PLC with motor drive table
- PP board mircoinching device

- Manual Sliding Table To Feed
- Four column Auto-balance Hydraulic Structure
- Auto-counting Function
- Cutting depth Adjustable Function
- Cutting Die Fixed Device
- PP cutting board
- Double hands to operate pressing cutting

Cutting Plastic Blisters Solutions

- Automatic Cutting Machine for blister packaging

- Stroke: 50-240mm(190mm, daylight 240mm)
- Cutting force 50 tons to 200 tons.
- Cutting area 610/710/810x1220/1400/1600mm...

- **Optional:**

- PP board micro inching device
- Single side or double sides feeding table
- Rotary feed or Chain feed.

- Dual feeding tables in both sides
- PLC control automatic system
- Auto-counting Function
- Cutting depth Adjustable Function
- Cutting Die Fixed Device

Cutting Plastic Blisters Solutions

- Cutting + Stacking tools Machine

- Stroke: 50-240mm(190mm, daylight 240mm)
- Cutting force 100 tons to 200 tons.
- Cutting area 710/810x1400/1600mm...
- With cutting and stacking tools free(customized)
- **Optional:**
- PP board micro inching device
- One side cutting, another side stacking, by chain to run the table
- Four column auto balance structure
- Hydraulic system

Cutting Plastic Blisters Solutions

- Clear Box Cutting Creasing Making Machine

- Stroke: 55-240mm(185mm, daylight 240mm)
- Cutting force 30 tons to 60 tons.
- Cutting area 660x1220mm...
- With Heating Plate
- **Optional:**
 - PP board micro inching device
 - Roller feeding device
- Heating function for creasing
- Four column auto balance structure
- Hydraulic system

Cutting Plastic Blisters Solutions

- Thermorforming+Cutting+ Stacking systems

Unwinding unit
片材开卷装置

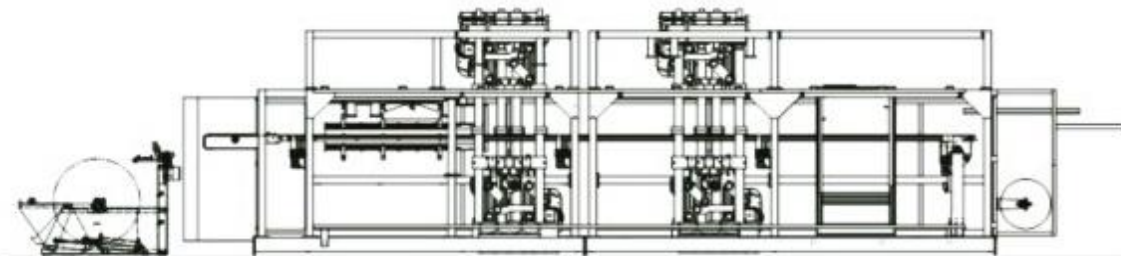

Heating
加热工位

Forming
成型工位

Cutting
分切工位

Stacking
堆叠工位

Scroll winding unit
废料回卷装置

铝模
Forming mold
